🌐 LinkedIn    🐙 Github    🔗 Portfolio    📊 Codeforces

I am a **Full-Stack Developer** with a strong foundation in computer science and expertise in building responsive, user-friendly web applications. With problem-solving skills sharpened through competitive programming, I seek a role where I can contribute to innovative web solutions, grow my technical expertise, and deliver impactful results.

## TECHNICAL SKILLS

**Front-End** — HTML, CSS, Tailwind CSS, JavaScript, React.js

**Back-End** — Node.js, Express.js

**Database** — MongoDB, MongoDB Atlas

**Tools** — Visual Studio Code, Git, GitHub, Figma, Firebase, Postman

**Interpersonal Skills** — Communication, Team work, Time management, Adaptability, Collaboration

## PROJECTS

**Brainiacs**, Team Collaboration Tool    📄

March 2025 – present

A complete collaboration hub, where teams can manage tasks, communicate with team and keep track of their activity and progress.

**Key Contribution:**

- Integrated AI chatbot using Gemini API into the dashboard for real-time support, enhancing user engagement.
- Enabled real-time task management system with drag-and-drop functionality using Dnd-kit.

**Technologies used** : Dnd-kit, Socket.io, TailwindCSS, React.js, React Router, Context API, Axios, Tanstack Query, Firebase, Node.js, Express.js, JWT, MongoDB.

**ScholarEase**, Scholarship management website    📄

January 2025 – present

A React-based web application that simplifies scholarship tracking, application management, and feedback processing for administrators and applicants.

- Users can apply for scholarships, track applications via a dashboard, and securely pay fees using Stripe.
- Users can submit, edit, and delete reviews, with ratings dynamically updating for better decision-making.
- Admins manage scholarships, users, and applications, with JWT authentication ensuring secure control.

**Technologies used** : TailwindCSS, React.js, React Router, Context API, Axios, Tanstack Query, Firebase, LocalStorage, Node.js, Express.js, JWT, MongoDB.
